

# HACH TECHNICAL TRAINING CENTER

Where participants from all professional backgrounds can benefit from educational, hands-on experience.

Anyone can push buttons on an instrument. But a guided exploration of the “why” behind analytical routines can help operators build greater confidence in their understanding of the instrumentation and the chemistries, in their ability to perform their own analytical tests, and in the quality of their test results.

That’s the whole purpose behind the **Hach Technical Training Center (HTTC)**—to help participants explore the theories behind their analytical routines, master various laboratory techniques, and return to their jobs with increased understanding and confidence. By employing a hands-on approach to teach users more about their instrumentation, Hach Technical Training Center classes make for an invaluable resource in operator and analyst education.

**THINK TRAINING. THINK HACH.**

## State-Approved Training

HTTC offers state-approved classes for continuing education credits in many states. Workshops cover a variety of topics in water treatment including:

- Municipal Drinking Water and Wastewater
- Industrial Wastewater
- Boiler and Cooling Tower Application
- QA/QC for Laboratories
- And more!

Classes are small and include a balance of lecture, classroom demonstration, and hands-on experience with Hach instrumentation. Instructors for each class have extensive experience in instruction and water analysis.

Class offerings, schedules, and locations are available at [hach.com/training](http://hach.com/training). If you are interested in having classes taught at your facility, contact us about incentives for hosting Hach State-Approved Training classes.

## Customized Training

In addition to our scheduled classes, HTTC also offers customized training which is designed for your individual needs and taught at your location or at the Hach Company in Loveland, Colorado. For information and pricing, call **800-227-4224 x2344** or e-mail: [httc@hach.com](mailto:httc@hach.com).
